

ASSEMBLY INSTRUCTIONS

Instructions

Thank you for choosing FreeBirds.

To ensure that your cot bed is used in accordance with these instructions, please read them fully .

WARNING: A child's safety is your responsibility.

WARNING: Do not use more than one mattress in this cot bed.

WARNING: Do not use the child's bed near heat sources of heat, such as electric bar fires, gas fires ,etc. in the near vicinity of the cot bed.

WARNING: Do not use this child's bed if any part is broken, torn or missing. Use only spare parts approved by the manufacturer.

WARNING: Do not leave anything in the cot bed or place the cot bed close to another product, which could provide a foothold or present a danger of suffocation or strangulation, e.g. strings, blind/curtain cords etc.

- The thickness of the mattress chosen should be such that the internal height is at least 500mm when the base is set in the lowest position and a minimum of 200 mm when the cot base is set in the highest position.

To prevent injury from falls:

-Children are likely to play, bounce, jump and climb on beds, therefore the child's bed should not be placed to other furniture or windows, and should be placed either tight to the wall or have a gap of 300mm between the wall and the side of the bed.

All assembly fittings should be tightened properly and care should be taken to ensure that no screws are loose, as a child could trap parts of the body, or clothing(e.g. ribbons, drawstrings, necklaces) this could lead to strangulation.

Please be aware that the lowest base position is the safest and the base should always be used in that position as soon as the baby is old enough to sit up.

Regularly check that all fittings and components of the cot /bed are fully tightened and in working order.

To prevent injury from falls the cot bed should not be used as soon as the child is able to climb out.

This cot bed should be assembled by an adult. Please note that this is a heavy cot bed which will be more easily assembled with the help of an assistant.

The cot bed is designed to be dismantled for storage or transportation.

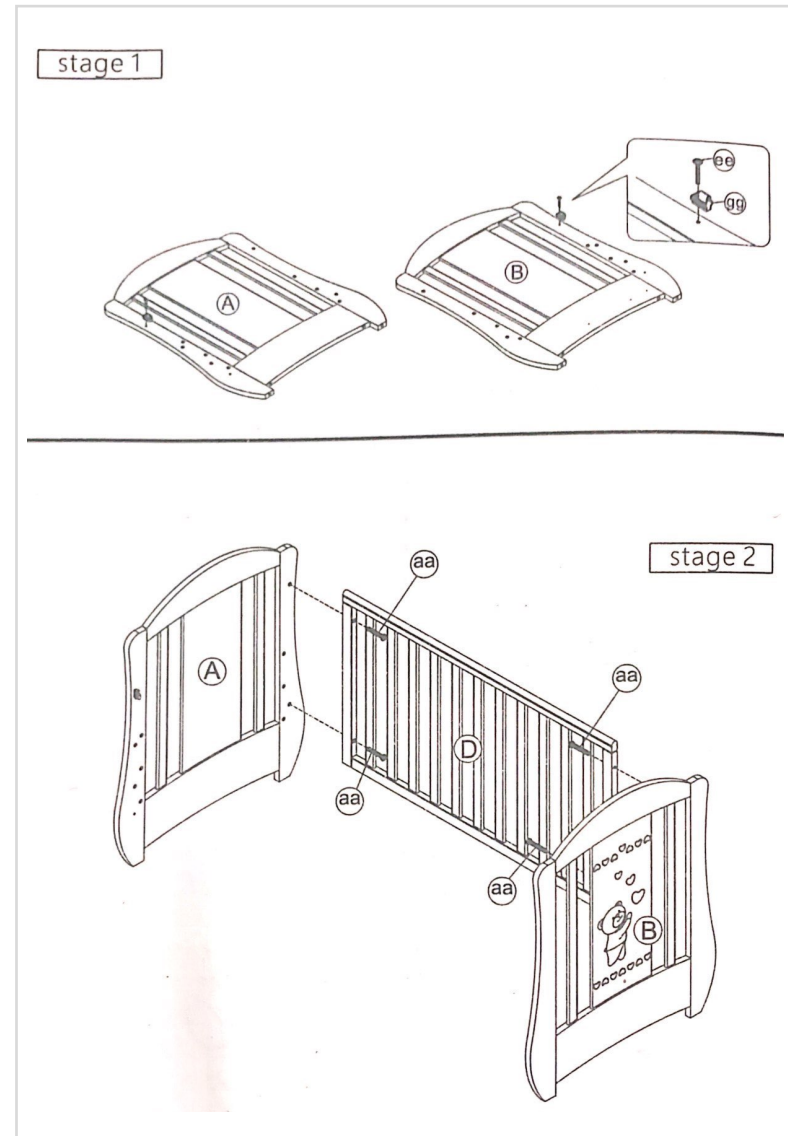

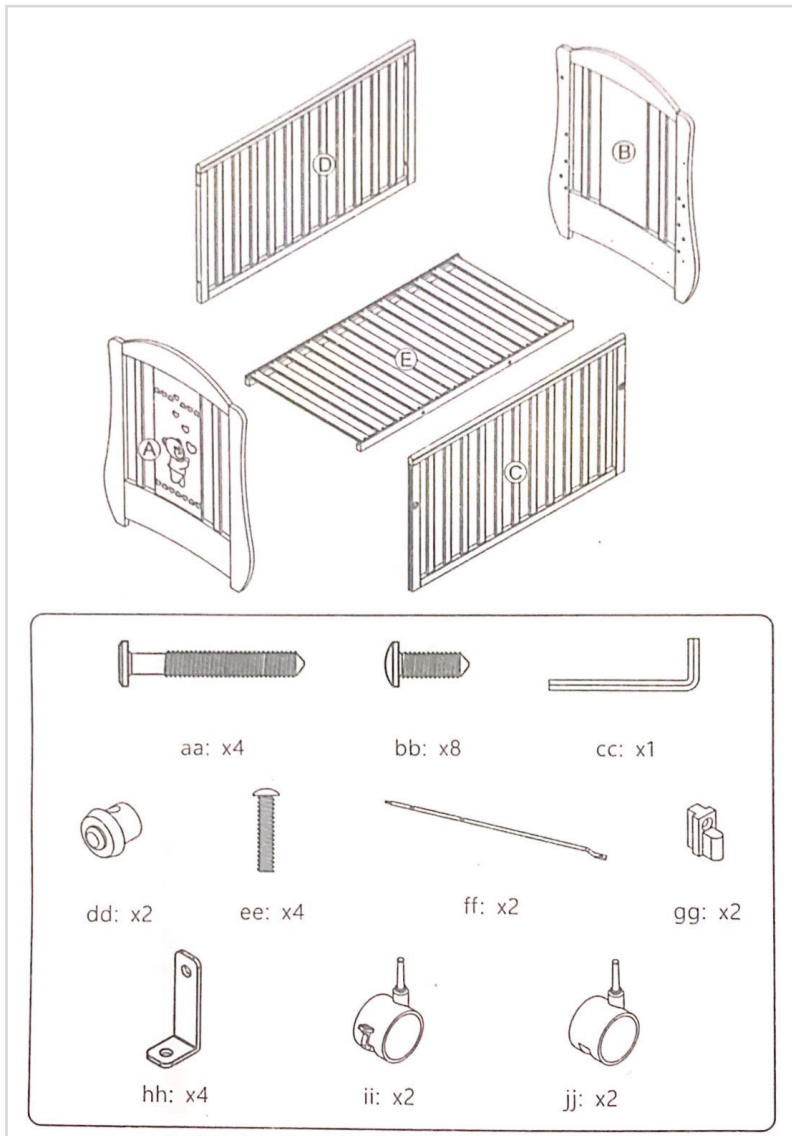

ROUTINE CARE AND MAINTENANCE

-For cleaning, use only a mild detergent and warm water.

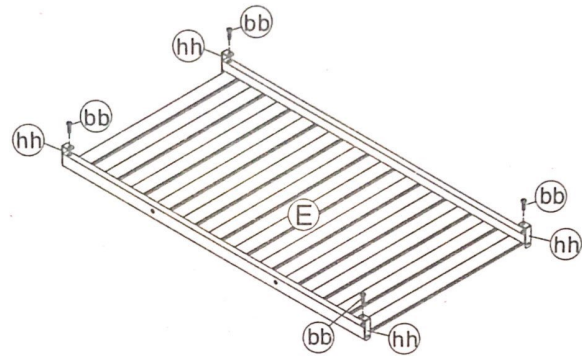

-DO NOT USE BLEACH

-DO NOT USE any abrasive substances

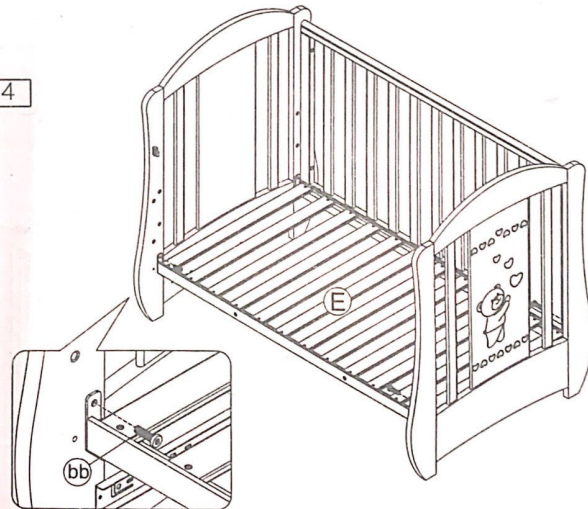

-From time to time, check your cot for loose screws, and worn parts. Replace or adjust the parts as needed.
